

Application Name: ChallengeMe!

Rationale: Many people want to improve themselves or add a bit of excitement to their daily routine, but it's easy to get stuck in habits or boredom. ChallengeMe! motivates users to try small, manageable personal challenges each day, encouraging creativity, social interaction, and self-growth. The app provides a fun and simple way to step out of one's comfort zone, track accomplishments, and explore new experiences.

Features:

- **Add / Edit / Delete Challenges** – Users can create custom challenges, modify existing ones, or remove ones they no longer want to do.
- **ListView for Completed Challenges** – Displays a history of all completed challenges with dates for easy tracking and reflection.
- **GridView for Challenge Categories** – Organizes challenges by type (e.g., Social, Creative, Physical, Mindfulness, etc.) for quick browsing.
- **SQLite Storage** – Stores all challenges and completion history locally for offline use and secure data management.
- **Random Challenge Generator** – Users can receive a randomized challenge from a selected category, adding an element of surprise and fun.
